

ANZ Wholesale Engineering Sample Project (Backend Development)

The sample application being requested by the candidate to build the **backend** REST APIs needed to support a web application to that allows a user to view accounts and subsequently view transactions on any of the accounts they hold.

Required functionality:

- View account list
- View account transactions

Guidelines:

UI

Not applicable and outside of the scope of this project.

Backend

Utilise standard java and spring boot projects as a base. Add any other framework as necessary.

Delivery

Code can be checked into github and shared back to the recruitment team for assessment.

Account List Enquiry

After logging in (outside of scope), a user will be presented with a list of their accounts in a table, with the basic account attributes on display (Account Number, Account Name, Account Type, Balance Date, Currency, Opening Available Balance)

Account Number	Account Name	Account Type	Balance Date	Currency	Opening Available Bala...
585309209	SGSavings726	Savings	08/11/2018	SGD	84,327.51
791066619	AUSavings933	Savings	08/11/2018	AUD	88,005.93
